FINANCE ANALYST / JUNIOR FP&A; / BUSINESS FINANCE

PROFILE

Finance Analyst / Junior FP&A; candidate focused on management P&L; budgeting, rolling forecast, variance/PVM, profitability, working capital and decision support. Builds auditable models, challenges financial drivers and converts analysis into owner-backed actions for commercial, sales and operations stakeholders.

CORE SKILLS

FP&A; | Annual budgeting | Rolling forecast | Management reporting | Variance / PVM | Gross-to-net | Product/channel/customer profitability | Promotion and pricing ROI | OPEX/headcount | CAPEX | DSO/DIO/DPO/CCC | Liquidity stress testing | Financial statement analysis | DCF / EV framing | Excel financial modelling | Finance data controls | Finance business partnering

SELECTED PROJECT

Commercial Finance & Profitability Analytics - VietNova Consumer JSC / Vietnam FMCG case

GitHub: github.com/susayold/commercial-finance-profitability-analytics | Portfolio: vn-finance-fpa-case.sangkenny200.chatgpt.site

- Built a formula-driven **28-tab FP&A model** over **36 months / 2,160 invoice lines**, connecting management P&L, FY2025 budget, forecast versions, PVM, product/channel/customer profitability, working capital, liquidity and scenarios; nine visible controls passed and the formula-error scan returned zero matches (**SIMULATED operating case**).
- Converted commercial drivers into decisions by mapping discounts, rebates, platform fees, trade spend and cost-to-serve; tested promotion/pricing cases against a **25% contribution hurdle** and documented owner, guardrail, timing and stop/scale actions (**SIMULATED / DERIVED**).
- Built the operating-finance layer beyond the P&L: MBR/KPI dictionary, recommendation register, battle cards, WD-5 to WD+5 close/forecast cadence, OPEX/headcount and CAPEX/fixed-asset bridges; validators cover design controls without claiming realised company impact (**SIMULATED / DERIVED**).
- Analysed **Masan Consumer FY2016-FY2025 public statements**: revenue CAGR **9.24%**, PAT CAGR **10.34%**, FY2025 operating margin **25.41%** and CFO/PAT **31.52%**; produced a credit memo and equity-research rehearsal with **22/22 QA**, thesis/scorecard and FY2017 provenance caveat (**PUBLIC / CALCULATED**).
- Built an EV-only FCFF/DCF rehearsal across Base/Upside/Downside cases (**VND 40,673.8bn-101,614.9bn EV**) and a synthetic M&A accretion/dilution screen; kept net debt, diluted shares and approved forecasts as explicit evidence gates rather than publishing a price target (**ANALYST_ASSUMPTION_REHEARSAL / SYNTHETIC**).

EDUCATION & ADDITIONAL

[Degree, Major] - [University], [City] | [Year]

Relevant coursework: Corporate Finance | Financial Statement Analysis | Management Accounting | Statistics | [CFA / other credential]

Languages: [Vietnamese] | [English level]

Certifications: [CFA / FMVA / other] | **Availability:** [date]

EVIDENCE DISCIPLINE

VietNova operating detail is synthetic; MCH/VNM figures are source-linked public evidence; valuation forecasts are analyst-assumption rehearsals. Do not claim internal forecast accuracy or realised business impact until approved live evidence is supplied.
