

Vietnam omnichannel FMCG | driver-based planning, performance and cash decisions

Decision in one line: protect cash while scaling profitable omnichannel growth. The base case is VND 82.5bn revenue, VND 12.9bn EBITDA proxy and 54.0 days CCC; downside guardrails are visible before action is approved.

REVENUE

82.5

VND bn | FY2025 base

EBITDA PROXY

12.9

VND bn | GP - controllable OPEX

MARGIN

15.6%

proxy margin | guardrail-led

CCC

54

days | cash conversion

WHAT WAS BUILT

01 Driver model

6,480 sales rows, 36 SKUs, 5 channels and 24 customers feed Actual, Budget, Forecast and Prior Year views.

02 Corporate finance layer

Linked P&L, cash flow, balance sheet, 36-month TB, GL management bridge, journal controls and subledger ties.

03 Decision cadence

Standard costing, macro drivers, forecast v2, 3-year operating plan, MBR, CFO memo and editable board pack.

SCENARIO AND FINANCE READOUT

SCENARIO ENVELOPE (VND BN / % / DAYS)

Metric	Base	Upside	Downside
Revenue	82.5	85.7	76.9
EBITDA proxy	12.9	17.4	3.5
Margin	15.6	20.4	4.5
CCC	54.0	48.0	68.0

Scenario values are proxy-derived planning outputs, not statutory results.

FINANCE ANALYST READOUT

1. Revenue and margin are managed together: volume, price/mix, discount and cost assumptions flow into contribution.

2. CCC is an explicit cash guardrail; the downside case stretches to 68.0 days and triggers working-capital review.

3. Every management output has an evidence class, source mapping, owner and OA tie-out before publication.

CONTROL RESULT

51/51 QA PASS

40/40 release gate

EVIDENCE AND NEXT STEP

EVIDENCE DISCIPLINE

Synthetic VietNova operating detail is labelled SIMULATED / DERIVED. EBITDA and cash-flow lines are management proxies. Public-company research remains a separate appendix. Power BI is archived and outside this active FP&A release.

HANDOFF STATUS

Ready for recruiter review. Remaining external inputs: approved internal forecast plus post-close actuals for live accuracy, human approval of commentary and a five-minute screen recording.
